Education

University of Washington Tacoma

June 2024

Bachelor of Science in Information Technology

GPA: 3.81

Experience

Webkey - Fullstack Developer / webkey.us/ / Seattle, Washington

Nov. 2023 – Current

- Boosted documentation by 30% company-wide through proactive examination of existing and newly implemented code.
- Eliminated server-wide Django dependency issues allowing for fresh changes to be deployed and accessible by all company-owned sites.
- Enhanced profit margins through the seamless integration and server administration of custom Content Management Systems.
- Furthered Django database functionality while implementing designs with SCSS, ensuring a seamless integration of style and structure.

Webkey - Fullstack Developer Intern / webkey.us/ / Seattle, Washington

Mar. 2023 – Nov. 2023

- Spearheaded the development of a fullstack application, connecting the Django database to the Next.js frontend.
- Empowered the spotlight on local businesses in the Seattle U District.

Connected Experiences

Sherman Community Players / scp.us.aldryn.io

- Stimulated product success margins by contributing ideas in an independent remote agile environment leading to an increase in customer satisfaction.
- Slashed manhours by improving upon existing complex features for the Wagtail CMS into the project codebase.
- Saved significant time on both code innovation and implementation across various existing and future projects.
- Generated comprehensive reports detailing meeting notes and work output, yielding valuable insights into potential spaces for growth.

Character Quiz / breath-of-the-wild-quiz.kenyon-huppe.com

- Refined user engagement by carefully scoping out the project plans along with involved calculations by setting clear and concise goals for improved UX.
- Maximized web performance by using React hooks and altering the state for improved data flow leading to an improved user experience.

To-Do List / <https://to-do-list.kenyon-huppe.com/>

- Optimized user engagement through the integration of data caching as well as the use of CRUD operations allowing for a streamlined user experience.

Vital / vital.biz

- Yielded increased foot traffic for Seattle U District businesses by creating a fullstack Next.js application.
- Reduced manhours company-wide through streamlining user profile integration into the Wagtail Django backend.
- Promotes the empowerment of local businesses, encouraging users to set ratings for a community-driven experience.
