Kenyon Huppe

+1(360) 489-4677 | kenyonhuppe@gmail.com | Kenyon-Huppe.com | github.com/Kenyon-Huppe

Education

University of Washington Tacoma   June 2024

Bachelor of Science in Information Technology   **GPA:** 3.79

Projects

Sherman Community Players / scp.us.aldryn.io

Achieved results in a self-directed remote environment, consistently meeting task schedules and maintaining meticulous technical documentation practices. Enhanced efficiency by integrating a custom search bar and dropdowns for Wagtail CMS into the project codebase, saving significant time on code innovation and implementation across various existing and future projects.

Character Quiz / breath-of-the-wild-quiz.kenyon-huppe.com

Developed a comprehensive application for analyzing Champion characters from *The Legend of Zelda: Breath of the Wild* using the React framework on a solo project. Utilized React hooks by altering the state and sending data to the given endpoint.

To-Do List / to-do-list.kenyon-huppe.com

Elevates user engagement by employing cutting-edge JavaScript techniques, encompassing CRUD operations, on a todo list website. Ensures sustained user engagement through the integration of data caching, allowing the storage of user data directly in the browser for a seamlessly enhanced experience.

Vital / vital.biz

Enhanced a full-stack Next.js application dedicated to showcasing local businesses in Seattle's U District. Fostered promotion and empowerment of local businesses, encouraging users to set ratings for a personalized and community-driven experience. Streamlined user profile integration, a resource leveraged by colleagues for external projects, resulting in significant time savings on research and implementation across the company.

Experience

Webkey - Fullstack Developer / webkey.us/ / Seattle, Washington   2023 – Current

Integrated and administrated a custom Content Management System (CMS) for the backend allowing for adaptive design functionality with the use of SCSS, ensuring a seamless integration of style and structure. Documented extensive changes and comprehensive reports detailing various findings and work output, providing valuable insights into the development process in an independent agile environment.

Webkey - Fullstack Developer Intern / webkey.us/ | Seattle, Washington   2023 – 2023

Championed the development of a full-stack application, seamlessly linking the Django database to the Next.js frontend empowering the spotlight on local businesses in Seattle's U District.

Interests and Achievements   .

- Annual Deans list.
- Memorized 176 lines in a British accent with blocking in under 2 months.
- Self-taught web development from the ground up, concurrently mastering the Japanese language independently and successfully managing these pursuits alongside academic studies.
- Independently navigated my first foreign country during a solo trip when my phone malfunctioned, relying solely on the compass on my watch and engaging with locals for guidance.
