Education

University of Washington | Tacoma, Washington   June 2024

Bachelor of Science in Information Technology   **GPA:** 3.79

Projects

Character Quiz / breath-of-the-wild-quiz.kenyon-huppe.com

- Developed a comprehensive user experience for analyzing Champion characters from *The Legend of Zelda: Breath of the Wild* game using React on a solo project.
- Utilizes a point-based system, facilitating seamless and precise selection choices for an enhanced user experience.

Sherman Community Players / scp.us.aldryn.io

- Achieved results in a self-directed remote environment, consistently meeting task schedules and maintaining meticulous documentation practices.
- Enhanced efficiency by integrating a custom search bar and dropdowns for Wagtail CMS into the project codebase, saving significant time on code implementation across various existing and future projects.

To-Do List / to-do-list.kenyon-huppe.com

- Amplifies user engagement through the application of contemporary JavaScript techniques, including CRUD operations, on a todo list website.
- Maintains user engagement through the implementation of data caching, enabling the storage of user data directly in the browser for a seamless experience.

Vital / vital.biz

- Developed a full-stack application spotlighting local businesses in the Seattle U District. The platform not only promotes special deals but also empowers users to set ratings for a personalized and community-driven experience.
- Efficiently manages user and business data by interfacing with remote Django databases, seamlessly pulling and updating information using Next.js.

Experience

Webkey - Remote Junior Frontend Developer / webkey.us/ / Seattle, Washington   2023 – Current

- Implemented designs within the Django database using SCSS.
- Formulated detailed reports on various findings and work output.
- Utilized the Wagtail CMS for generating modular content along with modifying fields to fit the needs of the given site.

Webkey - Remote Fullstack Developer Internship / webkey.us/ | Seattle, Washington   2023 – 2023

- Inherited and spearheaded continued development of a full stack application - modifying and connecting. the Django database to the Next.js frontend - to help spotlight local businesses in the Seattle U District.
- Migrated and improved upon designs of community-focused websites to boost social engagement in the U District.
